To whom it may concern;

RE: about Frank Strenk and Response Engineers.

**Response Engineers** is an electrical engineering firm that traces its roots to 1990 and has been Frank Strenk's full time business since 1994. For a time, the firm provided electrical system design, studies, and troubleshooting (hence Frank Strenk's moniker "Electrical Gun for Hire"). The present exclusive focus is specialized "Power System Studies" for commercial, industrial, and institutional facilities.

Frank is a Registered Professional Engineer (PE) in PA, NJ, DE, MD, NY, and AR. Hired as a consulting engineer by building owners, electrical contractors, electrical equipment suppliers, and other engineering firms, the studies performed are "short circuit-coordination-arc flash".

Bringing over thirty years of electrical engineering experience to clients; prior to starting private practice, positions held included development engineer in electrical apparatus manufacturing, plant and facilities engineering positions in the automotive electronics and pharmaceutical industries, and staff and chief electrical engineering positions for other consulting firms.

Frank holds B.S. and Masters Degrees in Electric Power Engineering from Rensselaer Polytechnic Institute (Troy NY) and is a member of the Electrical Association of Philadelphia.

Personal interests include motorcycling and ham radio. Frank volunteers with the Telford Fire Company as an apparatus driver/operator.
